

## **GOODREADS REVIEW BY DENEALE WILLIAMS**

**<https://www.goodreads.com/review/show/2177649067>**

**11/7/2017**

Let me start by telling you that the cover of this book is honestly quite beautiful. It looks mystical and quite secretive all at the same time. It is quite artistic, and I honestly like the way it is calling you in, making you want to open the book and check it out.

So, that's what I did. And I must admit, I am glad that I did. This book was truly a bit of a mystery and even suspense, and to top it off—a pinch of education all wrapped up into one. Thing is, I kept on reading because I wanted to know what all the hype was about and what was going to happen next. Once you start into this book, there is no putting it down, simply put, because there is something you will need to know after every page turn.

The lake on the cover is meant to be Oswego Lake, and it is on one of the moonlit nights. Our main character, Jonathan Oliver, is homeschooled. And he has a project to do. For this project, he is going to look into the source of the Lake Lights.

Yes, look at the cover of the book again. Jonathan and his curiosity has him wondering if maybe the marsh is causing the lights, or maybe some kind of gases.

Eventually, as Jonathan manages to search all around the lake, he finds the old Prosser Mine and many of its secrets. There are many old devices within this cave, things Jonathan didn't even understand.

On top of all of this, Jonathan's father, Matthew Oliver, ends up missing. Luckily, Jon's grandfather is willing to help decode the things Jon has found and figure out if they are dangerous or what. In the meantime, the father's past business partner wants to get his hands on one of the devices and has plans of his own to sell it to an organization up to no good.

Jon's discovery causes him to reveal more than he had bargained for. With all of these discoveries the scientific world can surely benefit from these findings. The main thing he has to keep warding off, is the partner who is up to no good and keep himself a step ahead of him. To do so will keep the town from ending up doomed.

This book features action and suspense and is truly entertaining, because you never know which way to turn and what will happen next. This is truly an entertaining five-star must-read for any age group! I in fact would recommend it as a bedtime story to read, not because it will put you to sleep, but because it seems like that kind of story I personally would like to have read to me before bed. But, that is just my opinion.
